Jishnu Mohan

Staff Software Engineer | Full-Stack

Phone: +91 9895 868 518 | Email: jishnu7@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Staff software engineer with 15 years building high-traffic consumer web and mobile products across e-commerce, fintech, and gaming. Early engineer at multiple startups, shipping products from zero to production. Works across the stack, Go and Node.js backends, React/TypeScript front-ends, and microservices on AWS and Google Cloud. Built Indic Keyboard (6M+ downloads, Mozilla MOSS Award), four-time Google Summer of Code mentor.

Work Experience

Narvar, Bangalore, India

Staff Software Engineer | April 2024 - Present

- Lead engineering on Narvar Secure (shipping protection insurance) across Shopify, SFCC, and headless commerce; deployed to multiple major retailer storefronts in production.
- Built shipping-protection.js, a platform-agnostic TypeScript SDK that extended Narvar Secure beyond Shopify to SFCC and headless commerce; designed the state machine, event bus, coordinator pattern, render engine and theming.
- Solved hostile-runtime widget integration on Shopify — built network-layer interception and DOM defenses that keep the checkout widget reliable across hundreds of merchant themes and third-party app combinations.
- Built the Go backend microservice covering policy and claims lifecycle, server-side premium validation, and tax/billing; designed a Cloud Tasks-based distributed polling architecture for third-party insurer status sync and provisioned Terraform (IaC) infrastructure end-to-end.
- Led reliability for Peak 2025: shipped emergency performance optimizations, authored the load-testing and monitoring plan, and drove code review across the team — zero bugs reported on the Shopify checkout extension during Peak.

Forma (formerly Twic), Fremont, CA (Remote, India)

Staff Software Engineer | April 2019 - February 2024

- Led engineering on a fintech employee-benefits product; built new features, mentored developers, and established organization-wide code standards, CI/CD, and tooling.
- Built and maintained React/TypeScript applications for the employee portal and multiple internal tools; led the migration of the AngularJS mobile app to React Native.
- Architected microservices on Google Cloud (App Engine, Cloud Functions, Firebase) and AWS Elastic Beanstalk; designed VPC/VPN interconnects spanning Google Cloud, AWS, and MongoDB Atlas.
- Implemented SAML IdP and SSO integrations with third-party providers; built SCIM support for Microsoft Azure Active Directory.
- Shipped physical and virtual debit card issuance with Stripe, and Twilio-based SMS notifications.

Tarobites, San Francisco, CA (Remote, India)

Software Engineer | December 2016 - March 2019

- Engineered the customer-facing website, backend APIs, chef portal, admin portal, and mobile apps for a Bay Area food-tech startup.
- Built the initial AngularJS frontend and led the subsequent rewrite to React.
- Contributed across the full stack — backend, frontend, and operations — and mentored junior engineers.

Hashcube Technologies, Bangalore, India

Senior Software Engineer & Team Lead | November 2012 - December 2016

- Built Sudoku Quest, the #1 Sudoku game on Facebook, with a PHP backend and Backbone.js frontend deployed on AWS.
- Led UI rewrite and player-ranking work on Dotgame; led engineering on Gummy Pop and managed a team of eight.
- Shipped mobile versions on the GameClosure 2D engine, authored native iOS/Android modules in Objective-C and Java, and upstreamed bugfixes and features to the engine.
- Owned Android and iOS app store release management; optimized performance on low-RAM devices through C/C++ and JavaScript profiling.

Earlier Experience *2011 - 2012*

- **Accel Frontline (Ushus Tech)**, Kochi — Software Engineering Trainee: built an Android DLNA media player and cross-compiled Linux PulseAudio for a proprietary embedded device.
- **Ubiqurio**, Kochi — Software Engineer: delivered multiple website frontend and backend projects in PHP and JavaScript.

Skills

Frontend: TypeScript, JavaScript, React, React Native, Redux, HTML/CSS, SDK design

Backend & Data: Go, Node.js, Express.js, Python, REST APIs, microservices, PostgreSQL, MySQL, MongoDB

Infrastructure: Google Cloud (GCP), AWS, Terraform, CI/CD, monitoring, performance & reliability

Integrations: Shopify, Salesforce Commerce Cloud (SFCC), Stripe, SAML, SCIM

Open Source & Recognition

Indic Keyboard — Built an Indian-language input method for Android with **6M+ downloads**; recipient of the **Mozilla Open Source Support (MOSS) Award, 2018**. Website, Source code

Google Summer of Code — Four-time mentor: 2013, 2014, 2016, and 2024.

GameClosure — Contributed bugfixes and features to the open-source 2D game engine used for mobile game development. Source code

SMS Attendance — Built a daily attendance SMS service reaching 2300+ students (85% of the student body) at MES College of Engineering. Source code

Media recognition — Indic Keyboard and SMS Attendance featured in The Hindu, Times of India, and The Economic Times; profiled in YourStory's Techie Tuesdays.

Education

MES College of Engineering, University of Calicut, Kerala, India

Bachelor's degree in Information Technology | 2007 to 2011
