SUMMARY

Staff software engineer with 15 years of experience building scalable web and mobile products across e-commerce, fintech, and gaming. An early engineer at multiple startups, shaping products from inception through growth, with deep JavaScript expertise and fluency across modern languages, frameworks, and cloud platforms. Active open source contributor — Mozilla MOSS Award recipient and four-time Google Summer of Code mentor.

SKILLS

Languages: JavaScript, Python, PHP, Go, HTML, CSS, SCSS, Less, Shell scripting; also C, C++, Java, Objective-C, Lua

Frameworks & Libraries: React, React Native, Redux, Node.js, Express.js, AngularJS, Vue.js, Backbone.js, Flask, Webpack, Babel, Mocha.js, GameClosure, Drupal, WordPress, Ghost, Codeigniter

Databases: MySQL, PostgreSQL, MongoDB, Memcached

Cloud & Platforms: AWS, Google Cloud, Heroku, OpenShift, Android, iOS, GNU/Linux (Arch, Debian, Ubuntu)

Integrations: Shopify, Salesforce Commerce Cloud, Stripe, Twilio, Amazon Alexa, SAML, SCIM

Tools: Git, Subversion, Debian & Arch Linux packaging, L^AT_EX, LibreOffice, GIMP, Inkscape, Blender

WORK EXPERIENCE

Narvar

Bangalore, India

Senior Software Engineer II

April 2024 – Present

- Lead engineering on the product recommendations track, partnering with the AI/ML team to deliver personalized recommendations across retailer storefronts.
- Build Shopify Checkout and theme app extensions that retailer clients install directly on their storefronts.
- Develop Salesforce Commerce Cloud and Salesforce PWA cartridges for the Shipping Protection Insurance product.
- Implement the Go backend for the Shipping Protection product, covering policy and claims lifecycle.
- Drive integration and rollout of Narvar products on retailer websites.

Forma (formerly Twic)

Fremont, CA (Remote, India)

Staff Software Engineer

April 2019 – February 2024

- Drove engineering on a fintech employee-benefits product end-to-end across the codebase; architected new features, mentored developers, and established organization-wide code standards and tooling.
- Built and maintained React applications for the employee portal and multiple internal tools; led the migration of the AngularJS mobile app to React Native.
- Architected services on Google Cloud (App Engine, Cloud Functions, Firebase) and AWS Elastic Beanstalk; designed VPC/VPN interconnects spanning Google Cloud, AWS, and MongoDB Atlas.
- Implemented SAML IdP and SSO integrations with third-party providers; built SCIM support for Microsoft Azure Active Directory.
- Shipped physical and virtual debit card issuance with Stripe, and Twilio-based SMS notifications.

Tarobites

San Francisco, CA (Remote, India)

Software Engineer

December 2016 – March 2019

- Engineered the customer-facing website, backend APIs, chef portal, admin portal, and mobile apps for a Bay Area food-tech startup.
- Built the initial AngularJS frontend and led the subsequent rewrite to React.
- Contributed across the full stack — backend, frontend, and operations — and mentored junior engineers.

Hashcube Technologies

Bangalore, India

Senior Software Engineer & Team Lead

November 2012 – December 2016

- Built Sudoku Quest, the #1 Sudoku game on Facebook, with a PHP backend and Backbone.js frontend deployed on AWS.
- Led UI rewrite and player-ranking work on Dotgame; led engineering on Gummy Pop and managed a team of eight.

- Shipped mobile versions on the GameClosure 2D engine, authored native iOS/Android modules in Objective-C and Java, and upstreamed bugfixes and features to the engine.
- Owned Android and iOS app store release management; optimized performance on low-RAM devices through C/C++ and JavaScript profiling.
- Built an Alexa skill with a Python backend on AWS Elastic Beanstalk.

Accel Frontline - Ushus Tech

Software Engineering Trainee

Kochi, Kerala

April 2012 – October 2012

- Built an Android DLNA media player and cross-compiled Linux PulseAudio for a proprietary embedded device.

Ubiquirio

Software Engineer

Kochi, Kerala

August 2011 – February 2012

- Delivered multiple website frontend and backend projects in PHP and JavaScript.

AWARDS & ACHIEVEMENTS

Mozilla Open Source Support (MOSS) Award, 2018: Awarded by Mozilla for contributions to Indic Keyboard.

Google Summer of Code: Mentor in 2013, 2014, 2016, and 2024.

National media coverage: Indic Keyboard and SMS Attendance featured in Deccan Chronicle, The Hindu, Times of India, Indian Express, The Economic Times, Malayala Manorama, Deshabhimani, Mathrubhumi, and Medianama.

Indic Keyboard #1 on Google Play Store: Ranked #1 in India, Saudi Arabia, and UAE in Top New Free Tools at launch.

Ubuntu App Showdown: DeskWiki selected among the top 50 applications in the contest.

YourStory feature: Profiled in YourStory's Techie Tuesdays column. [Link](#)

PROJECTS

Indic Keyboard — MOSS Award-winning Indian-language input method for Android with **3M+** downloads. [Website](#), [Source code](#)

Yet Another 2048 — Mobile-optimized rewrite of the 2048 puzzle game. [Web](#), [Source code](#)

SMS Attendance — Daily attendance SMS service for MES College of Engineering, reaching 2300+ students (85% of the student body) during its active period. [Source code](#)

Unicalbot — Bot that monitors a university website for updates and exam results and publishes them to social media. [Source code](#)

DeskWiki Editor — Desktop client for editing MediaWiki sites. [Source code](#)

Blender Add-Ons — Set of Blender add-ons for architects. [Solid Wall](#), [Integrated Library](#)

OPEN SOURCE CONTRIBUTIONS

LibIndic (Silpa), jquery.i18n, jquery.ime, Game Closure, DevkitHelper, CyanogenMod / LineageOS, GNOME Localization, SMC Fonts, More at <https://j15h.nu>

EDUCATION

MES College of Engineering, University of Calicut

Bachelor's degree in Information Technology

Kerala, India

2007 to 2011
